DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 1/28/2003 have been fully considered and are persuasive and Examiner gratefully acknowledges Applicant's explanation, clarifying an apparent misunderstanding of the relationship between the claims and the prior art. Therefore, the rejection of the claims made in the previous Office Action is withdrawn pending a continued search, which will be detailed in a subsequent Office Action.
2. Additionally, review of the claims, including the claims newly added in the amendment filed 1/28/2003, indicates a requirement for restriction, which is detailed below.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 24-37, 42-45, and 48-49 drawn to a method of packaging, classified in class 53, subclass 459.
 - II. Claims 1-21, 38-41, and 46-47, drawn to an article of manufacture, classified in class 206, subclass 439.

Art Unit: 3721

The inventions are distinct, each from the other because of the following reasons:

4. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process can be used to make a product that is not peelably sealed (as the product of Group I is) or folded into pleated sections (as the product of Group I is.)

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Sherrill Law Offices on 4/21/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
